

■ 30-Day Android + Java Learning Plan

This 30-day plan will take you from a beginner to intermediate level in Android development using Java.

By the end, you'll build a Social Media Detox App and a few smaller apps to strengthen your skills.

Day 1: Setup & First App

- Install Android Studio
- Create Hello World App in Java

Day 2: Layouts & Views

- Learn LinearLayout, ConstraintLayout
- Add TextView, Button

Day 3: Activity & Intents

- Understand Activity lifecycle
- Switch between two screens

Day 4: User Input & Forms

- EditText, Buttons, Toast messages
- Build Login screen

Day 5: Lists & RecyclerView

- Show scrollable lists
- Simple To-Do List App

Day 6: Adapter & Custom Lists

- Build custom list items with images and text

Day 7: Fragments

- Learn fragments for modular UI

Day 8: Navigation Components

- Bottom navigation, navigation graph

Day 9: Styles & Themes

- Apply colors, themes, dark mode

Day 10: Simple Calculator App

- Practice inputs, buttons, operations

Day 11: Storage (SharedPreferences)

- Save small data like settings

Day 12: SQLite Database

- Store user data in a database

Day 13: Room Database

- Use Room for modern DB handling

Day 14: Build Notes App

- CRUD operations with Room

Day 15: Permissions

- Request and handle permissions

Day 16: Notifications

- Local notifications for reminders

Day 17: Background Tasks

- Services and WorkManager basics

Day 18: Media (Images & Audio)

- Display images, play sounds

Day 19: Internet & APIs

- Fetch data with Retrofit/Volley

Day 20: JSON Parsing

- Load and display data from API

Day 21: Simple Weather App

- Fetch and show weather info

Day 22: Firebase Setup

- Add Firebase to app

Day 23: Firebase Auth

- Register & login with Firebase

Day 24: Firebase Database

- Save and load data online

Day 25: Firebase Storage

- Upload and download files

Day 26: Detox App – UI

- Layout for detox app
- Buttons for tracking time

Day 27: Detox App – Timer

- Add countdown for app blocking

Day 28: Detox App – Stats

- Show daily/weekly usage

Day 29: Detox App – Notifications

- Remind users when over time

Day 30: Final Project & Deployment

- Polish detox app
- Generate APK & test on phone
